Geophysical Research Letters

AN AGU JOURNAL

Aims and Scope. *Geophysical Research Letters* publishes high-impact, innovative, and timely research on major scientific advances in all the major geoscience disciplines. Papers are communications-length articles and should have broad and immediate implications in their discipline or across the geosciences. GRL maintains the fastest turn-around of all high-impact publications in the geosciences and works closely with authors to ensure broad visibility of top papers.

Editors: Noah Diffenbaugh (Editor-in-Chief) (diffenbaugh@stanford.edu, <http://orcid.org/0000-0002-8856-4964>), Lisa Beal, M. Bayani Cardenas (<http://orcid.org/0000-0001-6270-3105>), Kim Cobb, Meghan Cronin, Andrew J. Dombard, Tatiana Ilyina (<http://orcid.org/0000-0002-3475-4842>), Benoit Lavraud, Andrew V. Newman, W.K. (Bill) Peterson (<http://orcid.org/0000-0002-1513-6096>), Jeroen Ritsema (<http://orcid.org/0000-0003-4287-7639>), Julienne Stroeve (<http://orcid.org/0000-0002-0476-381X>), Joel A. Thornton, Paul D. Williams.

Associate Editors: Christopher Arridge, Olivier Bachmann, Rose Cory, Ake Fagereng, Mark E. Inall, Valeriy Ivanov, Steven Jacobsen, Paola Passalacqua, Joshua Schwarz, Shafer Smith, Toste Tanhua, Jacob Tielke, Peter A. Traykovski, Lixin Wang, Andrew Yau.

AGU Editorial Team. For assistance with submitted manuscripts, file specifications, or AGU publication policy please contact grlonline@agu.org.

For submission instructions or to submit a manuscript visit: <http://grl-submit.agu.org>.

The journal to which you are submitting your manuscript employs a plagiarism detection system. By submitting your manuscript to this journal you accept that your manuscript may be screened for plagiarism against previously published works.

Geophysical Research Letters accepts articles for Open Access publication. Please visit <http://olabout.wiley.com/WileyCDA/Section/id-406241.html> for further information about OnlineOpen.

Publication Charges. The publication charge income received for *Geophysical Research Letters* helps support rapid publication, allows more articles per volume, makes possible the low subscription rates, and supports many of AGU's scientific and outreach activities. Publication charge information can be found here: <http://publications.agu.org/author-resource-center/>.

To encourage papers to be written in a concise fashion, there is an excess length fee. For *Geophysical Research Letters* the fee is assessed only on the equivalent of more than 12 publication units. The excess length fee does not apply to review articles, and the editor may waive the fee on a limited number of concisely written papers that merit being longer. There is no charge for color in any format.

Copyright and Photocopying. Copyright © 2016. American Geophysical Union. All rights reserved. No part of this publication may be reproduced, stored or transmitted in any form or by any means without the prior permission in writing from the copyright holder. Authorization to copy items for internal and personal use is granted by the copyright holder for libraries and other users registered with their local Reproduction Rights Organisation (RRO), e.g. Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923, USA (www.copyright.com), provided the appropriate fee is paid directly to the RRO. This consent does not extend to other kinds of copying such as copying for general distribution, for advertising or promotional purposes, for creating new collective works or for resale. Special requests should be addressed to: publications@agu.org.

Disclaimer. The Publisher, American Geophysical Union, and Editors cannot be held responsible for errors or any consequences arising from the use of information contained in this journal; the views and

opinions expressed do not necessarily reflect those of the Publisher, American Geophysical Union, and Editors, neither does the publication of advertisements constitute any endorsement by the Publisher, American Geophysical Union, and Editors of the products advertised.

Individual Subscriptions. Member subscriptions are available through members.agu.org or by contacting the AGU Member Service Center. The Service Center is open from 8:00 a.m. to 8:30 p.m. Eastern time: +1 202 462 6900, +1 800 966 2481; Fax: +1 202 777 7393; e-mail: service@agu.org. Questions about meetings or membership will be referred to the appropriate staff.

Publisher. *Geophysical Research Letters* is published on behalf of the American Geophysical Union by Wiley Periodicals, Inc., 111 River St., Hoboken, NJ, 07030-5774, +1 201 748 6000.

Delivery Terms and Legal Title. Where the subscription price includes print issues and delivery is to the recipient's address, delivery terms are Delivered at Place (DAP); the recipient is responsible for paying any import duty or taxes. Title to all issues transfers FOB our shipping point, freight prepaid. We will endeavour to fulfil claims for missing or damaged copies within six months of publication, within our reasonable discretion and subject to availability.

GEOPHYSICAL RESEARCH LETTERS, (ISSN 0094-8276), is published semi-monthly by Wiley Subscription Services, Inc., a Wiley Company, 111 River St., Hoboken, NJ 07030-5774.

Periodical Postage Paid at Hoboken, NJ and additional offices.

Postmaster: Send all address changes to GEOPHYSICAL RESEARCH LETTERS, John Wiley & Sons Inc., C/O The Sheridan Press, PO Box 465, Hanover, PA 17331.

Journal Customer Services. For institutional subscription information, claims and any enquiry concerning your journal subscription please go to www.wileycustomerhelp.com/ask or contact your nearest office.

Americas: Email: cs-journals@wiley.com; Tel: +1 781 388 8598 or +1 800 835 6770 (toll free in the USA & Canada).

Europe, Middle East and Africa: Email: cs-journals@wiley.com; Tel: +44 (0) 1865 778315.

Asia Pacific: Email: cs-journals@wiley.com; Tel: +65 6511 8000.

Japan: For Japanese speaking support, Email: cs-japan@wiley.com; Tel: +65 6511 8010 or Tel (toll-free): 005 316 50 480.

Visit our Online Customer Help available in 7 languages at www.wileycustomerhelp.com/ask.

Production Editor. For assistance with post-acceptance articles and other production issues please contact GRLprod@wiley.com.

Access to this journal is available free online within institutions in the developing world through the AGORA initiative with the FAO, the HINARI initiative with the WHO, the OARE initiative with UNEP, and the ARDI initiative with WIPO. For information, visit www.aginternetwork.org, www.who.int/hinari/en, www.oaresciences.org, or www.wipo.int/ard/en.

Space Sciences

- 11,934** *Martin G. Mlynczak, Linda A. Hunt, James M. Russell III, B. Thomas Marshall, Christopher J. Mertens, and R. Earl Thompson*
The global infrared energy budget of the thermosphere from 1947 to 2016 and implications for solar variability (doi 10.1002/2016GL070965)
- 11,941** *C. Zhao, C. T. Russell, R. J. Strangeway, S. M. Petrinec, W. R. Paterson, M. Zhou, B. J. Anderson, W. Baumjohann, K. R. Bromund, M. Chutter, D. Fischer, G. Le, R. Nakamura, F. Plaschke, J. A. Slavin, R. B. Torbert, and H. Y. Wei*
Force balance at the magnetopause determined with MMS: Application to flux transfer events (doi 10.1002/2016GL071568)
- 11,948** *H. C. Godinez, Y. Yu, E. Lawrence, M. G. Henderson, B. Larsen, and V. K. Jordanova*
Ring current pressure estimation with RAM-SCB using data assimilation and Van Allen Probe flux data (doi 10.1002/2016GL071646)
- 11,957** *J. F. Carbary and D. G. Mitchell*
Seasonal variations in Saturn's plasma sheet warping (doi 10.1002/2016GL071790)
- 11,963** *B. Bonfond, D. Grodent, S. V. Badman, J.-C. Gérard, and A. Radioti*
Dynamics of the flares in the active polar region of Jupiter (doi 10.1002/2016GL071757)
- 11,971** *Fuliang Xiao, Qinghua Zhou, Zhenpeng Su, Zhaoguo He, Chang Yang, Si Liu, Yihua He, and Zhonglei Gao*
Explaining occurrences of auroral kilometric radiation in Van Allen radiation belts (doi 10.1002/2016GL071728)
- 11,979** *J. D. Carrillo-Sánchez, D. Nesvorný, P. Pokorný, D. Janches, and J. M. C. Plane*
Sources of cosmic dust in the Earth's atmosphere (doi 10.1002/2016GL071697)

Planets

- 11,987** *Nico Schmedemann, T. Kneissl, A. Neesemann, K. Stephan, R. Jaumann, K. Krohn, G. G. Michael, K. D. Matz, K. A. Otto, C. A. Raymond, and C. T. Russell*
Timing of optical maturation of recently exposed material on Ceres (doi 10.1002/2016GL071143)
- 11,994** *K. Krohn, R. Jaumann, K. Stephan, K. A. Otto, N. Schmedemann, R. J. Wagner, K.-D. Matz, F. Tosi, F. Zambon, I. von der Gathen, F. Schulzeck, S. E. Schröder, D. L. Buczkowski, H. Hiesinger, H. Y. McSween, C. M. Pieters, F. Preusker, T. Roatsch, C. A. Raymond, C. T. Russell, and D. A. Williams*
Cryogenic flow features on Ceres: Implications for crater-related cryovolcanism (doi 10.1002/2016GL070370)

Solid Earth

- 12,004** *R. J. Archuleta and C. Ji*
Moment rate scaling for earthquakes $3.3 \leq M \leq 5.3$ with implications for stress drop (doi 10.1002/2016GL071433)
- 12,012** *Nadav Wetzler, Emily E. Brodsky, and Thorne Lay*
Regional and stress drop effects on aftershock productivity of large megathrust earthquakes (doi 10.1002/2016GL071104)
- 12,021** *Noriko Tada, Pascal Tarits, Kiyoshi Baba, Hisashi Utada, Takafumi Kasaya, and Daisuke Suetsugu*
Electromagnetic evidence for volatile-rich upwelling beneath the society hotspot, French Polynesia (doi 10.1002/2016GL071331)
- 12,027** *S. Pasquet, W. S. Holbrook, B. J. Carr, and K. W. W. Sims*
Geophysical imaging of shallow degassing in a Yellowstone hydrothermal system (doi 10.1002/2016GL071306)
- 12,036** *Phoebe M. R. DeVries and Eileen L. Evans*
Statistical tests of simple earthquake cycle models (doi 10.1002/2016GL070681)
- 12,046** *Yao Yao and Aibing Li*
Lithospheric velocity model of Texas and implications for the Ouachita orogeny and the opening of the Gulf of Mexico (doi 10.1002/2016GL071167)
- 12,054** *E. Hopper, K. M. Fischer, S. Rondenay, R. B. Hawman, and L. S. Wagner*
Imaging crustal structure beneath the southern Appalachians with wavefield migration (doi 10.1002/2016GL071005)

- 12,063** *W. W. Chadwick Jr, J. B. Paduan, D. A. Clague, B. M. Dreyer, S. G. Merle, A. M. Bobbitt, D. W. Caress, B. T. Philip, D. S. Kelley, and S. L. Nooner*
Voluminous eruption from a zoned magma body after an increase in supply rate at Axial Seamount (doi 10.1002/2016GL071327)
- 12,071** *J. Suckale, T. Keller, K. V. Cashman, and P.-O. Persson*
Flow-to-fracture transition in a volcanic mush plug may govern normal eruptions at Stromboli (doi 10.1002/2016GL071501)
- 12,082** *S. Pilia, P. Arroucau, N. Rawlinson, A. M. Reading, and R. A. Cayley*
Inherited crustal deformation along the East Gondwana margin revealed by seismic anisotropy tomography (doi 10.1002/2016GL071201)

Hydrology and Land Surface Studies

- 12,091** *Chengji Shen, Chenming Zhang, Guangqiu Jin, Jun Kong, and Ling Li*
Effects of unstable flow on solute transport in the marsh soil and exchange with coastal water (doi 10.1002/2016GL070576)
- 12,102** *Vimal Mishra, Saran Aadhar, Akarsh Asoka, Sivananda Pai, and Rohini Kumar*
On the frequency of the 2015 monsoon season drought in the Indo-Gangetic Plain (doi 10.1002/2016GL071407)
- 12,113** *Eli D. Lazarus*
Scaling laws for coastal overwash morphology (doi 10.1002/2016GL071213)

The Cryosphere

- 12,120** *R. C. Toohey, N. M. Herman-Mercer, P. F. Schuster, E. A. Mutter, and J. C. Koch*
Multidecadal increases in the Yukon River Basin of chemical fluxes as indicators of changing flowpaths, groundwater, and permafrost (doi 10.1002/2016GL070817)
- 12,131** *Mats Lundh Gulbrandsen, Burke J. Minsley, Lyndsay B. Ball, and Thomas Mejer Hansen*
Semiautomatic mapping of permafrost in the Yukon Flats, Alaska (doi 10.1002/2016GL071334)
- 12,138** *L. Foresta, N. Gourmelen, F. Pálsson, P. Nienow, H. Björnsson, and A. Shepherd*
Surface elevation change and mass balance of Icelandic ice caps derived from swath mode CryoSat-2 altimetry (doi 10.1002/2016GL071485)
- 12,146** *Larissa Pizzolato, Stephen E. L. Howell, Jackie Dawson, Frédéric Laliberté, and Luke Copland*
The influence of declining sea ice on shipping activity in the Canadian Arctic (doi 10.1002/2016GL071489)
- 12,155** *Andreas Köhler, Christopher Nuth, Jack Kohler, Etienne Berthier, Christian Weidle, and Johannes Schweitzer*
A 15 year record of frontal glacier ablation rates estimated from seismic data (doi 10.1002/2016GL070589)
- 12,165** *Anders Damsgaard, David L. Egholm, Lucas H. Beem, Slawek Tulaczyk, Nicolaj K. Larsen, Jan A. Piotrowski, and Matthew R. Siegfried*
Ice flow dynamics forced by water pressure variations in subglacial granular beds (doi 10.1002/2016GL071579)

Oceans
